## Supported Apartments

**Supported Apartments** are innovative services that truly puts the person first. Supported Apartments are ideal for people who desire to find the balance between assistance with daily living skills and increased independence, and yet still appreciate the presence of professional, on-site support as needed.

Mary T. Inc. staff operate from a hub apartment which also serves as a community space. Direct service professionals are on-site and available 24 hours a day. This model provides both security and the flexibility to enable support to be customized on an individual basis. Each person has a support plan that is developed collaboratively with team members determined by the individual—truly a person-centered, person-first approach.

Grant has lived in Supported Apartments since June 2013. Prior to then, he lived in an adult foster care home for the majority of his adult life. Grant has been happy and successful living a more independent lifestyle at Supported Apartments.

*"I like eating dinner together in the hub, going bowling and on outings to music in the park with staff and friends. I really like hanging out at my friend's apartment and watching wrestling too!"*

Grant is definitely a people person, so he enjoys the social opportunities at Supported Apartments, yet takes pleasure in having his own space and independence.

## *Supports*

- Staff available 24 hours a day
- Support with medication, financial and household management
- Social activities
- Assistive technology
- Dietary support
